### **Drawings**

Fig. 11 as originally filed does not accurately reflect the written description of Fig. 11 as found in specification. A replacement Fig. 11 is submitted herewith. The written description of Fig. 11 is found at the bottom of page 8 in the specification as filed and is quoted below:

“In the case of the embodiment shown in Fig. 11, a plurality of recesses 39 are formed either totally or locally in the contact end of a pin 3.”

The original Fig. 11 incorrectly depicted a non-contact end of the pin and incorrectly illustrated a plurality of recesses 39 on the non-contact end. A contact end would have a rectangular profile as illustrated in Figs. 8, 9 and 10. In addition, the horizontal axis of a

contact end is B-B as illustrated in Figs. 8, 9 and 10 and not A-A as depicted in old Fig.

11. Replacement Fig. 11 corrects a drawing error, does not include new matter and is fully supported by the written description. Entry of replacement Fig. 11 is respectfully requested.
